## Borders

- Using Fabric B, cut two (2) strips (2 1/2") to 42" for the side borders (see note below). Match the center of the borders to the center of the panel and the end of each border strip to the edge of the panel. You may have to ease in either the panel or the border. Using side borders that are the same length will help to square up the panel if it's a bit wonky. Press away from the panel. Measure through the center width of the panel and cut two (2) more strips of Fabric B that equal the center measurement of the panel. Sew to the top and bottom of the panel. Press away from the panel.
- Use Fabric C and the same technique in Step 1 to add the 2nd border.
- Use Fabric D and the same technique in Step 1 to add the outer border.

NOTE: It is best to NOT prewash preprinted fabrics such as panels and border prints. The fabric goes through many processes to be delivered to the consumer and there may be some size variations. If you're unable to cut the panels to the size mentioned above, cut the pieces to a size that works for your panels and adjust any other measurements accordingly.
